PROFILE

Software engineer with a background in economics, finance, and operations management. Six years supporting CEOs and CFOs of listed companies in pharma, real estate, mining, and space tech built a strong ability to turn complex business requirements into technical solutions. Now building event-driven .NET backends at PostNord, with hands-on experience in integration development, legacy modernisation, and CI/CD, making for a developer who doesn't just write code, but understands why it matters.

EXPERIENCE

PostNord - Software Engineer — Jun 2026 - Ongoing

PostNord - Software Engineer Intern — Nov 2025 - May 2026

.NET backend developer in the International Mail division, building event-driven microservices that connect internal systems and external partners, in an agile environment with high requirements on reliability, traceability, and regulatory compliance.

- Led the full rewrite of a legacy EDI processing service, replacing regex-based parsing with a typed, model-driven approach and upgrading the codebase from .NET Core 3.1 to .NET 10, with NUnit unit tests added as part of the effort.
- Resolved production issues in legacy services, including replacing a byte-by-byte image comparison in an IPS service that was degrading database performance, fixing an EDI bug that displayed service names instead of locations, and merging duplicate events (one empty) to ensure correct field mapping.
- Contributed to the CI/CD pipeline setup and the migration from Bitbucket to GitHub across all repositories in the International Mail division, working with repository structure, branching strategy, and GitHub Actions workflows.
- Selected for PostNord's internal AI pilot study, working with AI-assisted development tools including GitHub Copilot.

Tech: .NET, C#, ASP.NET Core, REST APIs, Kafka, SQL Server, PostgreSQL, Azure, AKS, Docker, Kubernetes, OpenShift, CI/CD, Aspire, GitHub Actions, Grafana, GitHub Copilot, Jira, Confluence, UPU, IPS (International Postal System)

beQuoted - Investor Relations (part-time) — Jul 2025 - Aug 2025

beQuoted - Operations and Process Manager, Investor Relations — Aug 2018 - Jun 2024

Managed daily operations and process improvement while directly supporting the CEOs and CFOs of publicly listed companies with investor relations and corporate communication. Served as the key link between management and the operations team.

- Designed, built, and delivered over 60 IR and corporate websites for Nasdaq Stockholm and First North listed companies, developing broad cross-industry knowledge across pharma, real estate, mining, space tech, gaming, security, media tech, and finance.
- Acted as the primary point of contact between senior management and the daily operations team, ensuring alignment on priorities, processes, and deliverables.
- Held personnel responsibility for the operations team, including day-to-day leadership and performance management.
- Ensured full regulatory adherence to Nasdaq Stockholm and First North disclosure requirements across all client platforms and communications.
- Drove continuous process improvements across the operations function, raising efficiency and output quality.

EDUCATION

Nackademin, Solna - Software Developer .NET Aug 2024 – May 2026

Two-year vocational higher education programme covering .NET, C#, ASP.NET Core, API development, databases, DevOps, CI/CD, Azure, and security, plus JavaScript, TypeScript, and React.

Mittuniversitetet, Sundsvall - B.Sc. Business Administration Graduated 2019

Three-year programme in business administration (ekonomie kandidatexamen).

SKILLS

Backend .NET, C#, ASP.NET Core, Entity Framework, LINQ, REST APIs, SQL Server, PostgreSQL, unit testing (xUnit, NUnit), integration testing, TDD

Messaging Kafka, event-driven architecture, microservices

Cloud/DevOps Azure, Azure Kubernetes Service (AKS), Docker, Kubernetes, OpenShift, GitHub Actions, Git, CI/CD, Aspire, Grafana, Agile/Scrum

Frontend JavaScript, TypeScript, React (coursework)

AI Tools GitHub Copilot, Claude, Gemini, Anthropic API (personal projects), AI-assisted development

Domain Investor relations, financial reporting, Nasdaq/First North regulatory compliance, cross-industry business logic

Languages Swedish (native), English (fluent), Turkish (proficient)
